

**New Century Health Appoints Paul Marchetti as Chief Growth Officer  
New CGO to Advance Value-Based Arrangements with Oncology Practices and Health Plans**

**Wellesley, MA, April 10, 2017** New Century Health (NCH) today announced that Paul Marchetti has joined the company's executive leadership team as its Chief Growth Officer (CGO).

Marchetti brings over 25 years of experience in leading service delivery transformation for health plans and health systems. He joins NCH after more than a decade of responsibilities including leading Aetna's National Clinical Operation and Provider Networks. In addition, Paul successfully led the integration of clinical operations after Aetna's acquisition of Coventry Healthcare as well as the implementation of clinical programs supporting ACO relationships. Mr. Marchetti has also held senior leadership roles at United Healthcare, Horizon Healthcare and at Physician Health Services.

"I am thrilled to have Paul join our company. Paul brings a unique set of experiences and accomplishments in critical areas of healthcare transformation as NCH continues to innovate as a leader in specialty care management," said Dr. Atul Dhir, Chief Executive Officer of New Century Health. "Paul will have a significant impact in how we continue to innovate and serve both our health plans and physician partners in the delivery of high quality and affordable cancer and cardiac care." he added.

"I am excited to be joining New Century Health! What attracted me is the company's combination of executive and leadership talent, outstanding technology-enabled clinical capabilities and proven experience in risk-based specialty care delivery," said Marchetti. "I am honored to lead the growth, product innovation and adoption of NCH's specialty care solutions."

**About New Century Health**

New Century Health is the national leader in value-based specialty care management programs, with special focus on Oncology and Cardiology. Today we serve millions of members across the country working closely with physician practices, health plans and Management Services Organizations (MSOs). Our value-based specialty care quality management platform leverages technology, data analytics and specialized clinical knowledge to coordinate care within the fragmented specialty care delivery system. Provider groups, health plans and payers' partners with us to provide better care for millions of Medicare, Commercial and Medicaid members in more than 40 states.
